Dictionary

Individual Lemma

The dictionary interface provides a help function for the citation of individual lemmata. The default scheme is:\[1\]

[Author(s)] ([Year]): [Lemma]. eDiAna [Version].
http://www.ediana.gwi.uni-muenchen.de/dictionary.php?lemma=[Identification Number]

Individual Lemma Chapter

As the dictionary is assembled on the fly, it cannot provide stable page numbers. Therefore the smallest referential unit is the chapter / subchapter:

[Author(s)] ([Year]): [Chapter], [Subchapter]. In: eDiAna s.v. [Lemma]. eDiAna [Version].
http://www.ediana.gwi.uni-muenchen.de/dictionary.php?lemma=[Identification Number]

Example

http://www.ediana.gwi.uni-muenchen.de/dictionary.php?lemma=219

\[1\]Squared bracket [...] = placeholder
